

LF HAVELOCK GLOBAL SELECT

INVESTMENT OBJECTIVE AND POLICY

The fund aims to achieve investment growth over 3 - 5 years. The fund will invest at least 60% on a global basis in company shares. The Investment Manager believes that decisions based on data support a more disciplined approach to investing. They undertake detailed data analysis to identify companies which they believe should increase in value over the long term and which, in their opinion, are undervalued. The fund will also invest in bonds (which are issued by companies and governments and pay a specified rate of interest). The proportion of the fund invested in bonds will change depending on the Investment Manager's opinion on the investment outlook, with the aim of both meeting the objective but also reducing the size of any falls in the fund's value.
