

Key Investor Information

This document provides you with the key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

LF Havelock Global Select, A Accumulation, a fund within LF Havelock London Investment Funds (ISIN: GB00BFM7DN78)

The fund is managed by Link Fund Solutions Limited, part of the Asset Services Division of Link Administration Holdings Limited.

Objective and investment policy

Objective

The fund aims to achieve investment growth (net of fees) over 3-5 years

Investment Policy

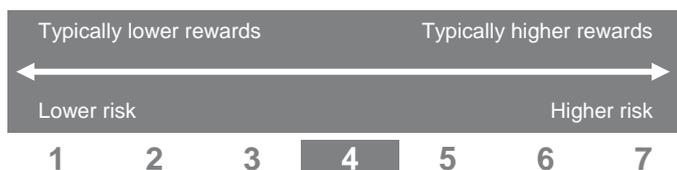

To invest at least 60% of the fund on a global basis in company shares. The Investment Manager believes that decisions based on data support a more disciplined approach to investing. They undertake detailed data analysis to identify companies which they believe should increase in value over the long term and which, in their opinion, are undervalued.

The fund will also invest in bonds (which are issued by companies and governments and pay a specified rate of interest). The proportion of the fund invested in bonds will change depending on the Investment Manager's opinion on the investment outlook, with the aim of both meeting the objective but also reducing the size of any falls in the fund's value.

Essential features of the fund:

- Bonds will be rated as "investment grade" at time of purchase. The term "investment grade" means that in the opinion of a credit agency, the likelihood that the bond issuer will not pay the interest due or repay the loan is low.
- Up to 15% of the fund may be invested in companies listed in emerging markets.
- The fund will usually hold between 25-50 stocks and at times may be concentrated (see risk warning).
- Derivatives and forward currency contracts may be used to manage the risk profile of the fund, reduce costs or generate additional capital or income. The fund has the discretion to invest in the investments as described above with no need to adhere to a particular benchmark.
- In extraordinary market conditions which could result in significant loss, the fund has the ability to invest 100% in lower risk assets such as cash.
- You can buy and sell shares in the fund on each business day.
- Income from the fund will be added to the value of your investment.
- Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Risk and reward profile

- This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free.
- The fund has been classed as 4 because its volatility has been measured as average.
- This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund.
- The risk and reward profile shown is not guaranteed to remain the same and may shift over time. Investors may not get back the amount originally invested and may lose money. There is no assurance that the objective of the fund will be achieved.
- Counterparty risk: As the fund may enter into derivative agreements there is a risk that other parties may fail to meet their obligations. This may lead to delays in receiving amounts due to the fund, receiving less than is due or receiving nothing.
- Emerging Market Risk: Emerging markets tend to be more susceptible to large short term swings than more established markets. There is also a greater risk of being unable to buy or sell securities or that other parties may default and not meet their obligations, causing loss to the fund.
- Currency Risk: As the fund invests in overseas securities, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.
- Concentration Risk: the fund may hold a small number of investments and may therefore be subject to larger than normal swings in its value.
- Bond Risk: Bonds are affected by trends in interest rates and inflation. If interest rates go up the value of capital may fall and vice versa. Inflation will also decrease the real value of capital. The value of a bond is also affected by its credit rating.
- The value of investments, and the income from them, will fluctuate. This will cause the fund price to fall as well as rise and you may not get back what you originally invested.
- For full details of the fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' below.

Charges for this Fund

The charges you pay are used to pay the costs of running the fund. These charges reduce the potential growth of your investment.

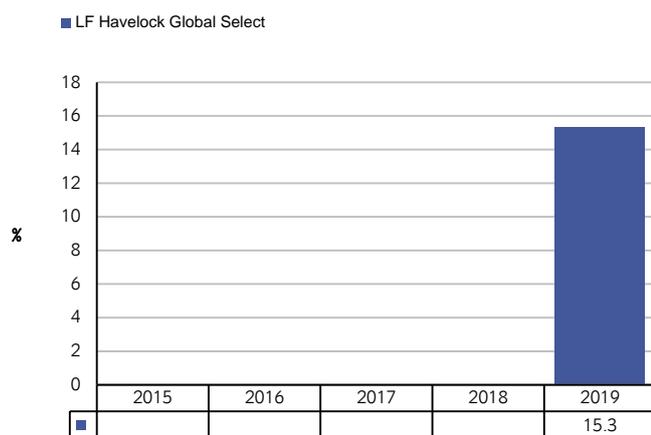

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None
Charges taken from the fund over the year	
Ongoing Charges	0.99%
Charges taken from the fund under certain specific conditions	
Performance Fee	None

The total charges (which include the ongoing charges) the fund will pay is capped at 0.99%. This includes portfolio transaction costs. Investors will be given 60 days notice if this changes.

A dilution adjustment may be made which may increase or decrease the price you receive when you buy or sell shares in the fund

For more information about charges, please see Sections 3.5 & 7 of the prospectus, which may be obtained free of charge from the address in 'Practical Information' below

Past performance

- Past performance is not a guide to future performance.
